

Street Tree

Planting Palette

Welcome to the City of Belmont's Street Tree Palette, a comprehensive guide to the diverse array of trees enriching our urban landscape. Recognising the pivotal role trees play in enhancing both natural beauty and urban environments, the City of Belmont is committed to cultivating a vibrant and sustainable ecosystem within our community.

Aligned with Australian Standards, our annual Street Tree Planting Program sources

and nurtures tree stock from seed, ensuring the highest quality and longevity of our urban canopy. With careful planning, trees are ordered well in advance, allowing for ample growing time, thus guaranteeing a resilient and thriving urban forest for generations to come.

Each winter, the City of Belmont embarks on its mission to further enrich our streetscapes through the Street Tree Planting Program. Residents are encouraged to participate by

requesting a street tree for their verge, with the understanding that the City will manage all aspects of planting, pruning, and initial watering. Moreover, ongoing maintenance of these trees will be undertaken by the City, ensuring their continued health and vitality.

Explore our Street Tree Palette to discover the diverse range of species contributing to the vibrancy of the City of Belmont.

Key

Evergreen

A tree or shrub that retains living leaves all year long, regardless of the season.

Deciduous

A tree or shrub that sheds its leaves annually, generally around Autumn and Winter.

Semi Deciduous

Semi-deciduous or semi-evergreen is a botanical term that refers to plants that lose their foliage for a very short period, when old leaves fall off and new foliage growth is starting.
